WORK EXPERIENCE

Senior Software Engineer, Medical Device R&D *CooperSurgical / CT, USA (Remote) / May 2023 - Present*

- Developed a container as an SDK solution for multiple medical device products using Docker, gRPC, MongoDB, RabbitMQ, and Zeroconf, and support for .NET, Node.js, Python, and C++
- Architected secured medical software for IVF workstations, including integration with purpose-built embedded Linux, SDLC for compliance, GitLab CI/CD pipelines, and containerized applications
- Crafted a message streaming UI using ASP.NET Core for hardware/firmware integration with RFID
- Built utilities and provided documentation to streamline the organization's software development and delivery processes, such as NuGet network connectivity libraries and CLI automation scripts
- Created an RPC-based kiosk-like real-time UI using Electron, Framer Motion, Redux, and Next.js

Software Engineer, DevOps and Leadership *StageSource / MA, USA / Sep 2022 - Dec 2022*

- Led a 6-developer team and delivered a team-development workflow and a product prototype using uWSGI, Django, Nginx, and PostgreSQL, deploying through GitHub Actions to AWS instances

Software Engineer, Mobile Web Games *Shopee / Taipei, Taiwan / Jan 2020 - Feb 2022*

- Implemented high-volume tolerant socket connections using Socket.IO, Express.js, and Redis for multi-player real-time SPA games built upon Ant Design, Phaser, React.js, Redux, TypeScript, and Three.js, accommodating over 200,000 daily traffic and the highest RPS of 10,000
- Integrated region data warehouse and deployment pipelines with global services, with a TTD-enforced workflow using GCP to manage, operate, and monitor cloud services

Software Engineer, Cross-Platform UX Integration *Edallianz / Taipei, Taiwan / Jan 2019 - Nov 2019*

- Launched an RWD UI framework using SASS and Webpack to restructure websites built with Apache HTTP Server, Django, MySQL, and Tornado

Software Engineer, Digital Transformation *Servicetech International / Taichung, Taiwan / Jun 2017 - Nov 2018*

- Formulated the supply chain management workflow to develop a PWA using Firebase, Ionic, and React.js
- Initiated a configurable website using Bootstrap and PHP, and a CIS material warehouse

EDUCATION

Massachusetts Institute of Technology *Cert. in Data Science and Machine Learning / Aug 2023 - Nov 2023*

- Ranked 15 out of 131 participants
- Score 579.5/600

Boston University *M.S. in Computer Science / May 2022 - Jan 2024*

- Ranked 3rd in infrastructure services configuration and defense at [NCAE-C 2023](#), North East Division
- 1st Author for "[Quantitative DevSecOps Metrics for Cloud-Based Web Microservices](#)", *IEEE Access*, vol. 12, pp. 160317-160342, 2024, doi: 10.1109/ACCESS.2024.3486314
- GPA 3.8/4.0

New York University *Cert. in Preparatory Course for Graduate Studies in Computing / Jan 2022 - May 2022*

National Formosa University *B.F.A. in Multimedia Design / Sep 2023 - Jan 2017*

SKILLS

Programming	C#, JavaScript/TypeScript, Python, Bash/Unix Shell
Cloud	AWS (EC2, ECS, RDS, S3, etc.), GCP (Firebase, GCE, GCS, CloudRun, etc.)
DevOps	Docker, GitLab CI/CD, GitHub Actions, Kubernetes, LocalStack, Terraform, SupervisorD
Framework	ASP.NET Core, .NET SDK, Django, Express.js, Flask, gRPC, Next.js, React.js, Redux
Database	MySQL, MongoDB, PostgreSQL, Redis, SQL
Other	Avahi, CSS (SASS), Envoy, HTML, Linux, Nginx, OpenCV, RabbitMQ, Tensorflow
